

Rolling Fiefdoms

Designed by Grégory Heitz

Overview

In **Rolling Fiefdoms**, you build a small fief through clever dice pairing and planning. Each turn, you'll roll four dice, pair them to decide **what** and **where**, and gradually fill your fief with cottages, markets, and landmarks. When all plots are filled, score your activated buildings to see whose fief prospers most.

Setup

1. Give each player one **Fiefdom Sheet** and a pencil.
2. Take two coloured d6 dice as **Event dice** , where a 6 is a  face.
3. Take two other coloured d6 dice as **Wind Rose dice** , where a 6 is a  face.
4. Choose a starting **Active Player**. Turns proceed clockwise.
5. On your own sheet, write the name of your fiefdom in the banner.

Fiefdom Sheet

The Fiefdom Sheet is a complex board used for tracking game progress. It includes:

- Fiefdom's banner:** A banner at the top for the player's name, currently showing "Stormhelm".
- Plot:** A 5x5 grid of hexagonal plots. Some plots are filled with buildings (Cottage, Farm, Quarry, Windmill, Market, Townhall, University, Guilds, Springhouse, Vagrants). A blue path connects the center plots.
- Worker requirement marker:** A blue square with a white number (2) placed on a plot.
- Population square:** A square containing a population marker (a yellow die with a red X on the 6 face).
- Population marker:** A yellow die with a red X on the 6 face.
- Scoring track:** A track at the bottom for scoring buildings: Cottage, Farm, Quarry, Windmill, Market, Townhall, University, Guilds, Springhouse, Vagrants, and Reputation. Each has a corresponding icon and a plus sign.
- Pestilence reminder:** A section on the right with a red X icon and the text "Forfeit 1 empty plot in your fief".
- Event dice reminder:** A section on the right with a yellow die icon and the text "Event dice reminder".
- Housing and Population track:** A track on the right for housing and population, with a yellow die icon.
- Buildings reference:** A table on the right listing buildings and their requirements:

Building	Requirements
1 Cottage 	Outline 1 Housing unit  2 VP per occupied Housing
2 Farm 	3 VP (+2 VP if adjacent to a Springhouse)
3 Quarry 	3 VP (+1 VP if in the same row or column with another Quarry)
4 Windmill 	3 VP (+1 VP per adjacent Windmill)
5 Market 	3 VP per population in adjacent populated Squares 
6 Springhouse 	5 VP (+2 VP per unique active basic building  in the same row or col.) -1 VP per adjacent Forfeited Plot
7 Townhall 	5 VP (+2 VP per unique active basic building  in the same row or col.)
8 University 	5/8/12/15 VP for 1/2/3/4 unique advanced buildings  in your fief
9 Springhouse 	5/8/12/15 VP for 1/2/3/4 unique advanced buildings  in your fief
10 Guild 	15 VP per activated and fulfilled Guild (see Guilds below)
- Guilds reference:** A table on the right listing guilds and their requirements:

Guild	Requirements
1 Farmers' Guild 	15 VP if you have one contiguous group of at least 4 active Farms
2 Quarry Guild 	15 VP if you have one contiguous group of at least 4 active Quarries
3 Windmills' Guild 	15 VP if you have at least 4 active Windmills on the outer edges
4 Merchants' Guild 	15 VP if you have at least 4 active Markets in the Centre 
- Turns track (solo):** A track at the bottom for tracking turns, with a yellow die icon.

Turn Structure

Every turn follows three steps:

- 1 **Roll** all dice.
- 2 **Split** them into two sets.
- 3 **Build** or Forfeit a plot.

After everyone has built, the dice pass to the player on the left, who becomes the new Active Player and starts a new turn.

Solo Variant

Play with the same rules, alternating between **Active** and **Non-active** turns (Turns track).

- On **Active** turns, roll and pair the dice as usual.
- On **Non-active** turns, roll all four dice:
 - Pair the **two Wind Rose dice**  together.
 - Pair the **two Event dice**  together.

① ROLL

Roll all four dice.

If 2 ✨ are rolled (6 on 🎲), then all dice must be re-rolled.

PESTILENCE

When both ✖ appear (6 on 🎲), it's a **Pestilence turn**:

1. **Skip Pairing and Action.**
2. **Forfeit one empty plot** in your fief.

3. The turn ends immediately. **Pass the dice to the player on the left**, who becomes the new Active Player and starts a new turn.

② SPLIT

The Active Player pairs the four dice into two sets (for example, 1,3,4,5 → (1,5) and (3,4)). Everyone uses these same pairs. Each player decides which pair is the **Build Pair** (what to build) and which is the **Location Pair** (where to build).

③ BUILD

Each player acts simultaneously.

Choose one pair to Build, one as Location:

- The **Location Pair** shows where you'll build (e.g. dice 2 and 5 → (2,5) or (5,2)).
- The **Build Pair** decides what you'll build.

✖ and ✨ rolls (6 faces):

- If one ✖ (6) appears on 🎲, that die may not be used for the Location Pair.
- If one ✨ (6) appears on 🎲, that die must be used for the Location Pair. It is a wild, and each player decides the value to use (between 1 and 5).

Build Options:

- **Sum:** Add both dice. Build a **Basic** (2–5) or **Advanced** (7–10) building. If the sum is 6, you may build a **Springhouse**.
- **Split Action:** Use one die (1–5) to build a Basic building. Fill pips matching the other die's value in an empty adjacent Square as **Population**. If all population Squares are filled, you may still build, but add no population.

- **Single ✖ (6):** If one ✖ appears on 🎲, you may still build, but add no population.

After building in a location, **outline the number of Workers required** at the top of the plot.

Example

You roll 1,3,4,5. The active player pairs them (1,5) and (3,4). You pick (3,4) as your Build (7 → Townhall) and (1,5) as your Location: draw a Townhall outlining 4 workers required.

If both possible locations are blocked, you must **Forfeit** a plot by crossing out any empty plot of your choice.

Population & Housing

When population is gained via **Split Actions**, it is tracked both on your **Population & Housing track** and on the population Squares of your fief.

Population & Housing

Each **Cottage** provides housing for **4 Population** (outline the left-most available unit on the track).

Population & Housing

If your total Population exceeds available Housing, the excess becomes **Vagrants**. For scoring, Vagrants cause a penalty of **-1 VP per Vagrant**.

Example

You have 15 Population and 3 Cottages. Housing = $3 \times 4 = 12 \rightarrow$ Vagrants = $15 - 12 = -3$ VP total.

Building Reference

Basic Buildings (2–5)

Value	Building	Req	Effect / Scoring
2	Farm	2	3 VP (+2 if next to a Springhouse)
3	Quarry	2	3 VP (+1 if in the same row/col as another Quarry)
4	Windmill	2	3 VP (+1 if adjacent to another Windmill)
5	Market	3	1 VP per Population pip in adjacent spaces

Special Buildings (1 & 6)

Value	Building	Req	Effect / Scoring
1	Cottage	0	When built, outline 1 Housing unit; 2 VP if occupied by at least 1 Population (Population and Housing track)
6	Springhouse	0	When built, remove 1 Worker requirement (min 0) from an adjacent building; -1 VP per adjacent Forfeited plot

Advanced Buildings (7–10)

Value	Building	Req	Effect / Scoring
7	Townhall Max. 1	4	5 VP + 2 VP per unique activated Basic type in its row or column.
8	University Max. 1	3	5/8/12/15 VP for 1/2/3/4 unique Advanced (built even if inactive)
9	Almshouse Max. 1	2	Cancel up to 12 VP of Vagrant penalty at game end
10	Guild Max. 2	4	Build a unique Guild type (see Guild Types)

Guild Types

Farmers:	15 VP for a group of 4 or more connected Farms.
Quarry:	15 VP for a group of 4 or more connected Quarries.
Windmillers:	15 VP if 4 or more Windmills along the outer edges.
Merchants:	15 VP if 4 or more Markets in the Centre.

When building a guild, you must immediately decide which guild you are building.

Game End & Scoring

The game ends when **every player's 25 plots are filled**, whether built or forfeited. Everyone then scores simultaneously.

During Scoring:

- Activate Buildings:** For each with a Worker Requirement, assign adjacent Population pips to fill Worker requirements and mark each used pip - 1 Population pip can **only** be used for allocating 1 Worker in one adjacent building. When the Worker requirement is met, that building becomes **Activated** by outlining its plot.

- Score Buildings:** Activated buildings earn their listed VP and bonuses. Nonactivated ones score nothing themselves, but may still count for bonuses.
- Score Cottages:** Each occupied Cottage (outlined Housing unit) = 3 VP.
- Apply Penalties:** Lose 1 VP per Vagrant (activated Almshouse cancels up to -12 VP).

The player with the **most VP wins the game**. In case of a tie, the player with the most population wins.

Clarifications

- You may build even if all adjacent population Squares are filled (no new population).
- When both coordinates are unavailable, you must forfeit any empty plot.
- You cannot add population pips to a Square that has already pips, even if not all 5 pips are filled. Population can only be added to empty Squares.
- When using "Single" or "Split Action" build, you cannot forfeit the building to add population. You cannot add population without adding a building.
- Basic building scoring bonuses do not require other buildings to be active.
- Townhall counts only **activated Basic Buildings**.
- University counts all **built Advanced Buildings**.
- When a **Springhouse** is built, immediately reduce the Requirement of one adjacent building by 1 (min 0).
- You may build multiple of the same building type, except those marked (Max. 1 per game).
- Guilds scoring requires that the matching basic buildings be active.
