

Rolling Fiefdoms ~ by Grégory Heitz

1-6 players
20-30 minutes

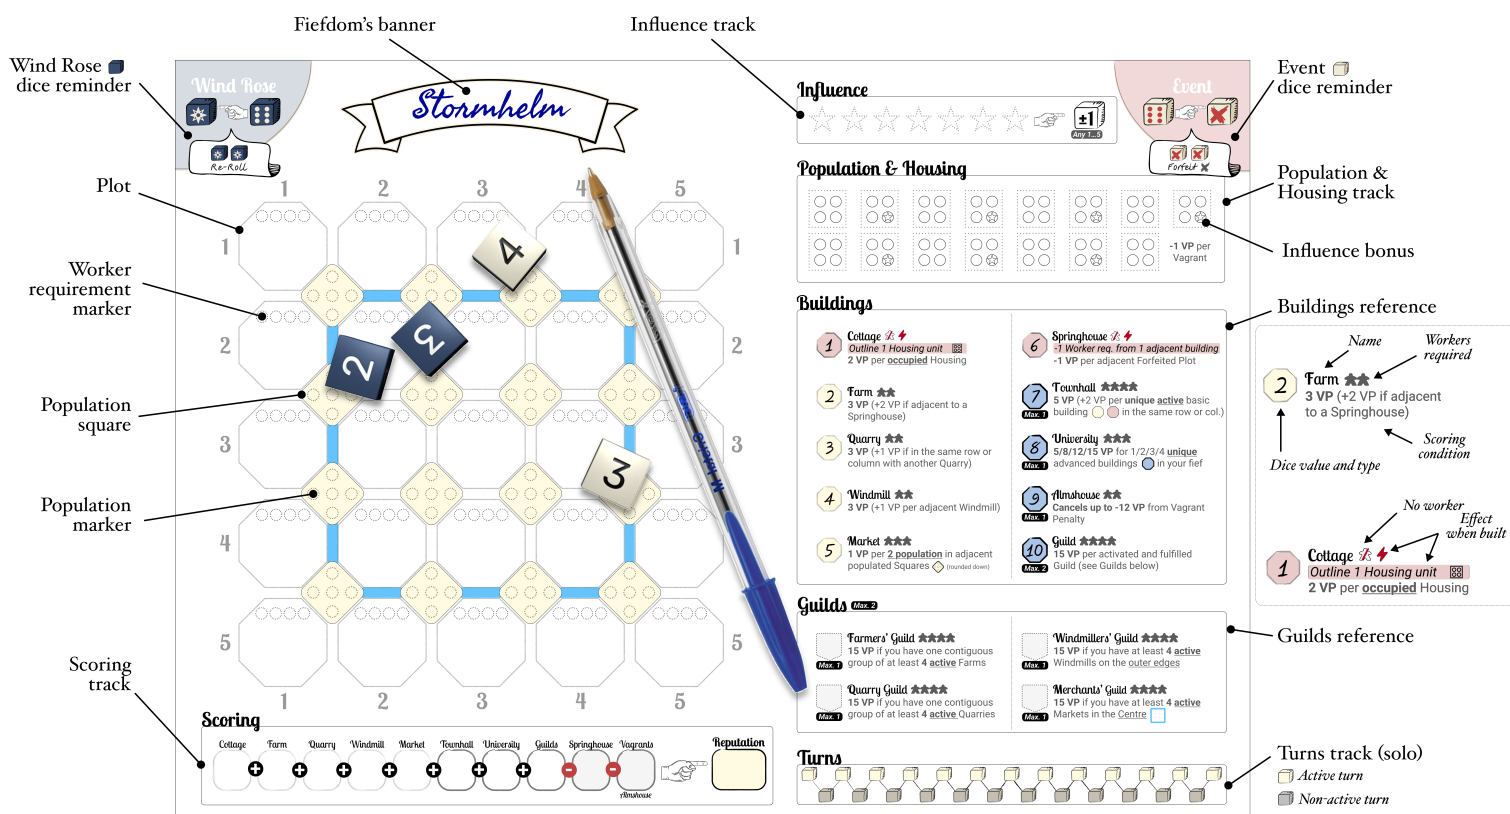

Overview

In **Rolling Fiefdoms**, you build a small fief through clever dice pairing and planning. Each turn, the Regent will roll four dice, pair them, then players will decide where to build cottages, markets, and landmarks in their fief. When all plots are filled, allocate workers to score buildings and to see whose fief prospers most.

Setup

1. Give each player one **Fiefdom Sheet** and a pen.
2. On your own sheet, write the name of your fiefdom in the banner.
3. Take two white d6 dice as **Event dice** (6 is a ) and put them where players can reach.
4. Take two blue d6 dice as **Wind Rose dice** (6 is a ) and put them where players can reach.
5. Choose a starting **Regent**. Turns proceed clockwise.

Fiefdom Sheet

The Fiefdom Sheet is a 5x5 grid of plots. Each plot is a hexagon with a central square. The grid is surrounded by a border of 10 squares (5 on each side). The top border is labeled 'Fiefdom's banner' and contains a banner for 'Stormhelm'. The right border is labeled 'Influence track' and contains a track of 10 stars. The bottom border is labeled 'Scoring' and contains a track of 10 squares. The left border is labeled 'Wind Rose dice reminder' and contains a reminder for the Wind Rose dice. The grid is divided into four quadrants by a central cross. The top-left quadrant is labeled 'Plot' and contains a 'Worker requirement marker'. The top-right quadrant is labeled 'Population square' and contains a 'Population marker'. The bottom-left quadrant is labeled 'Buildings' and contains a list of buildings with their costs and effects. The bottom-right quadrant is labeled 'Guilds' and contains a list of guilds with their costs and effects. The right side of the sheet contains a 'Buildings reference' table and a 'Guilds reference' table. The bottom right corner contains a 'Turns' track and a 'Population' track.

Buildings reference:

Name	Workers required	Scoring condition
1 Cottage	3 VP (+2 VP if adjacent to a Springhouse)	2 VP per occupied Housing
2 Farm	3 VP (+2 VP if adjacent to a Springhouse)	3 VP (+2 VP if adjacent to a Springhouse)
3 Quarry	3 VP (+1 VP if in the same row or column with another Quarry)	3 VP (+1 VP if in the same row or column with another Quarry)
4 Windmill	3 VP (+1 VP per adjacent Windmill)	3 VP (+1 VP per adjacent Windmill)
5 Market	3 VP (+1 VP per adjacent Market)	1 VP per 2 population in adjacent populated Squares (rounded down)
6 Springhouse	5 VP (+2 VP per unique active basic building in the same row or col.)	-1 VP per adjacent Forfeited Plot
7 Townhall	5 VP (+2 VP per unique active basic building in the same row or col.)	5 VP (+2 VP per unique active basic building in the same row or col.)
8 University	5/8/12/15 VP for 1/2/3/4 unique advanced buildings in your fief	5/8/12/15 VP for 1/2/3/4 unique advanced buildings in your fief
9 Filmhouse	15 VP per activated and fulfilled Guild (see Guilds below)	15 VP per activated and fulfilled Guild (see Guilds below)
10 Guild	15 VP per activated and fulfilled Guild (see Guilds below)	15 VP per activated and fulfilled Guild (see Guilds below)

Guilds reference:

Name	Workers required	Scoring condition
1 Farmers' Guild	15 VP if you have one contiguous group of at least 4 active Farms	15 VP if you have one contiguous group of at least 4 active Farms
2 Windmillers' Guild	15 VP if you have at least 4 active Windmills on the outer edges	15 VP if you have at least 4 active Windmills on the outer edges
3 Quarry Guild	15 VP if you have one contiguous group of at least 4 active Quarries	15 VP if you have one contiguous group of at least 4 active Quarries
4 Merchants' Guild	15 VP if you have at least 4 active Markets in the Centre	15 VP if you have at least 4 active Markets in the Centre

Turns:

Active turn:  Non-active turn: 

Turn Structure

Every turn, follow three steps:

1. The Regent **rolls** all four dice.
2. The Regent **splits** them into two pairs.
3. Every player **builds** or forfeits a plot.

After everyone has built or forfeited a plot, the dice pass to the player on the left, who becomes the new Regent and starts a new turn.

PESTILENCE

When both  appear, it's a **Pestilence event**:

1. **Skip Split and Build.**
2. All players **forfeit one empty plot** in their fief (see **Forfeit**).
3. The turn ends immediately. **Pass the dice to the player on the left**, who becomes the new Regent and starts a new turn.

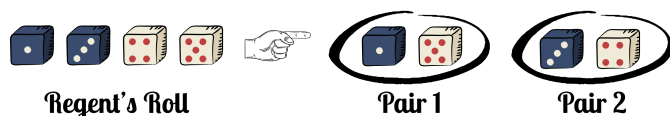

1 ROLL

The Regent rolls all four dice.

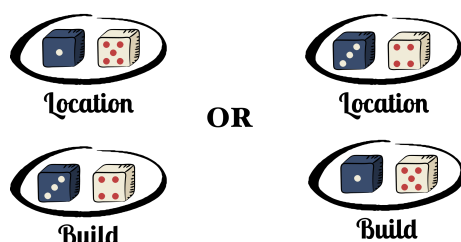

If 2  are rolled, then all dice must be re-rolled.

2 SPLIT

The Regent pairs the four dice into two sets.

Each player decides which pair is the **Build Pair** (what to build) and which is the **Location Pair** (where to build).

3 BUILD

Each player acts simultaneously.

Choose one pair to Build, one as Location:

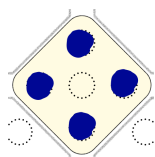

- The **Location Pair** shows where you'll build (e.g. dice 1 and 5 → (1,5) or (5,1)).
- The **Build Pair** decides what you'll build (see Building Reference) (e.g. dice 3 and 4 → Quarry, Windmill or Townhall).

 and  rolls:

- If one  appears on , that die may not be used for the Location Pair.
- If one  appears on , that die must be used for the Location Pair. It is a wild, and each player decides the value to use (between 1 and 5).

Build Options:

- Sum:** Add both dice to build a **Basic** (2–5), an **Advanced** (7–10) building, or a **Springhouse** (6).
- Split:** Use one die (1–5) to build. Use the other die to allocate **Population** by filling pips matching the die's value in an empty adjacent Square. If there is no empty Square, you may still build, but do not add population.

If the Build pair has one  on , you may still build a Basic building. This is a Build Split without population.

After building in a location, **outline the number of Workers required** for that building at the top of the plot (see Buildings Reference). Those are the Workers required to activate the building at the end of the game.

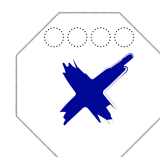

Example

The Regent rolled 1-3-4-5 and pairs them (1,5) and (3,4). You pick (3,4) as your Build (7 → Townhall) and (1,5) as your Location: draw a Townhall outlining 4 workers required.

FORFEIT

If neither location is empty, you must **Forfeit** a plot by drawing a cross on an empty plot of your choice.

Buildings Reference

There are 10 types of building available each with a different  build value,  workers requirement for scoring, and scoring conditions.

Basic Buildings (2–5)

Basic buildings can be built with a Split or Sum.

	Building		Scoring
2	Farm (F)	2	3 VP (+2 if next to a Springhouse)
3	Quarry (Q)	2	3 VP (+1 if in the same row/col as another Quarry)
4	Windmill (W)	2	3 VP (+1 if adjacent to another Windmill)
5	Market (M)	3	Score 1 VP per 2 Population <i>pips</i> across all adjacent Squares (tally pips, divide by 2, round down)

Special Buildings (1 & 6)

Special buildings have effects that trigger only when built.

 Building	 Effect / Scoring
1 Cottage (C)	0 When built, outline 1 Housing unit. 2 VP if occupied by at least 1 Population (Population and Housing track)
6 Springhouse (S)	0 When built, remove 1 Worker Requirement (min 0) from an adjacent building. -1 VP per adjacent Forfeited plot

Advanced Buildings (7–10)

Advanced buildings can only be built with a Sum.

 Building	 Scoring
7 Townhall (T) Max. 1	4 5 VP + 2 VP per unique activated Basic or Special type in its row or column.
8 University (U) Max. 1	3 5/8/12/15 VP for 1/2/3/4 unique Advanced building built
9 Almshouse (A) Max. 1	2 Cancel up to 12 VP of Vagrant penalty at game end
10 Guild Max. 2	4 Build a unique Guild type (see Guild Types)

Guild Types

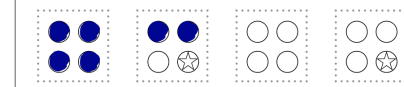

When building a guild, you must immediately decide which guild you are building by writing its initials.

Farmers (FG)	15 VP for a group of 4 or more connected Farms.
Quarry (QG)	15 VP for a group of 4 or more connected Quarries.
Windmillers (WG)	15 VP if 4 or more Windmills along the outer edges.
Merchants (MG)	15 VP if 4 or more Markets in the Centre.

Population & Housing

When population is gained using the **Build Split**, it is tracked both on your **Population & Housing track** and on the Squares of your fief.

Population & Housing

Each **Cottage** provides housing for 4 **Population** (outline the left-most available unit on the track).

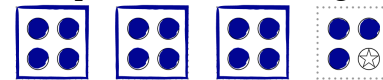

Population & Housing

If your total Population exceeds available Housing, the excess becomes **Vagrants**. For scoring, Vagrants cause a penalty of **-1 VP per Vagrant**.

Example

You have 15 Population and 3 Cottages.

Housing = $3 \times 4 = 12 \rightarrow$ Vagrants = $15 - 12 = 3 \rightarrow$ Penalty = -3 VP.

Influence

Covering  on the Population & Housing track grants one **Influence point**. When gained, outline the leftmost Influence point on the Influence track.

Influence

During the Build action, use Influence to **increase or decrease by 1 the value of any one die** per Influence point spent. Scribble over each Influence point used.

Influence

You cannot use Influence to change a  or  roll.

The change of value of a die using Influence only affects the player using it. The split pairs stay unchanged for all other players.

Example

The Regent rolled 1-3-4-5 and pairs them (1,5) and (3,4). But, both Location pairs are occupied. To avoid forfeiting a plot, you spend 2 Influence points to use the 3-die as a 1, so you can build at the location (1,4) that is empty in your fief.

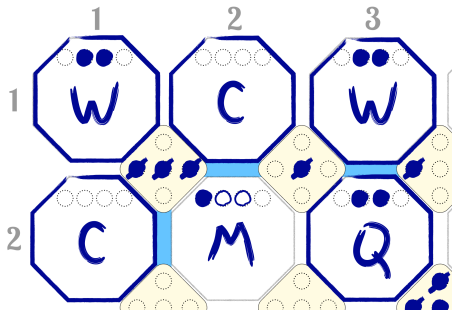

Game End & Scoring

The game ends when **every player's 25 plots are filled**, whether built or forfeited. All players proceed to the building activation phase before the final scoring.

① BUILDINGS ACTIVATION

For each building with a Worker Requirement, players assign adjacent Population pips to fill Worker Requirements and cross out each used pip. 1 Population pip can **only** be used for allocating 1 Worker in one adjacent building.

When the Worker Requirement is met, that building becomes **Activated** by outlining its plot.

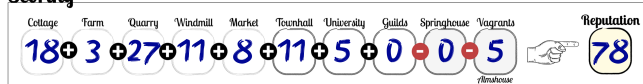

② SCORING

1. **Score Cottages:** Each occupied Cottage (outlined Housing unit with at least one filled pip) is worth 2 VP.
2. **Score Buildings:** Activated buildings earn their listed VP and bonuses. Nonactivated ones score nothing themselves, but may still count for bonuses.
3. **Springhouse Penalty:** Lose 1 VP per Forfeited plot adjacent to a Springhouse.
4. **Vagrant Penalty:** Lose 1 VP per Vagrant (activated Almshouse cancels up to -12 VP).

The player with the **most VP wins the game**. In case of a tie, the player with the most population wins.

Scoring

Solo Variant

Play with the same rules, alternating between **Active** and **Non-active** turns (Turns track).

- On **Active turns**, roll and pair the dice as usual.
- On **Non-active turns**, roll all four dice:
 - Pair the **two Wind Rose dice** (blue) together.
 - Pair the **two Event dice** (yellow) together.

Clarifications

Build

- You cannot add population pips to a Square that already has any pips, even if not all 5 pips are filled. Population can only be added to empty Squares.
- When using Split build, you cannot forfeit the building to add population. You cannot add population without adding a building.
- When a Springhouse is built, immediately reduce the Requirement of one adjacent building by 1 (min 0).
- You cannot use Influence on more than one die during the Build action.
- Influence cannot decrease a die value below 1 or increase its value above 5.

Scoring

- Basic building scoring bonuses do not require other buildings to be active.
- Buildings with a Worker Requirement of 0 are considered activated.
- Townhall counts only activated Basic or Special Buildings.
- University counts all built Advanced Buildings (activated or not).
- Almshouse does not grant VP if there are less than 12 vagrants.
- Guilds scoring requires that the matching basic buildings be active.
- Population from a Square can be shared by multiple Markets.

Playtesting & Thanks

Huge thanks to everyone who playtested and gave feedback.
