

Rolling Fiefdoms ~ by Grégory Heitz

1-6 players
20-30 minutes

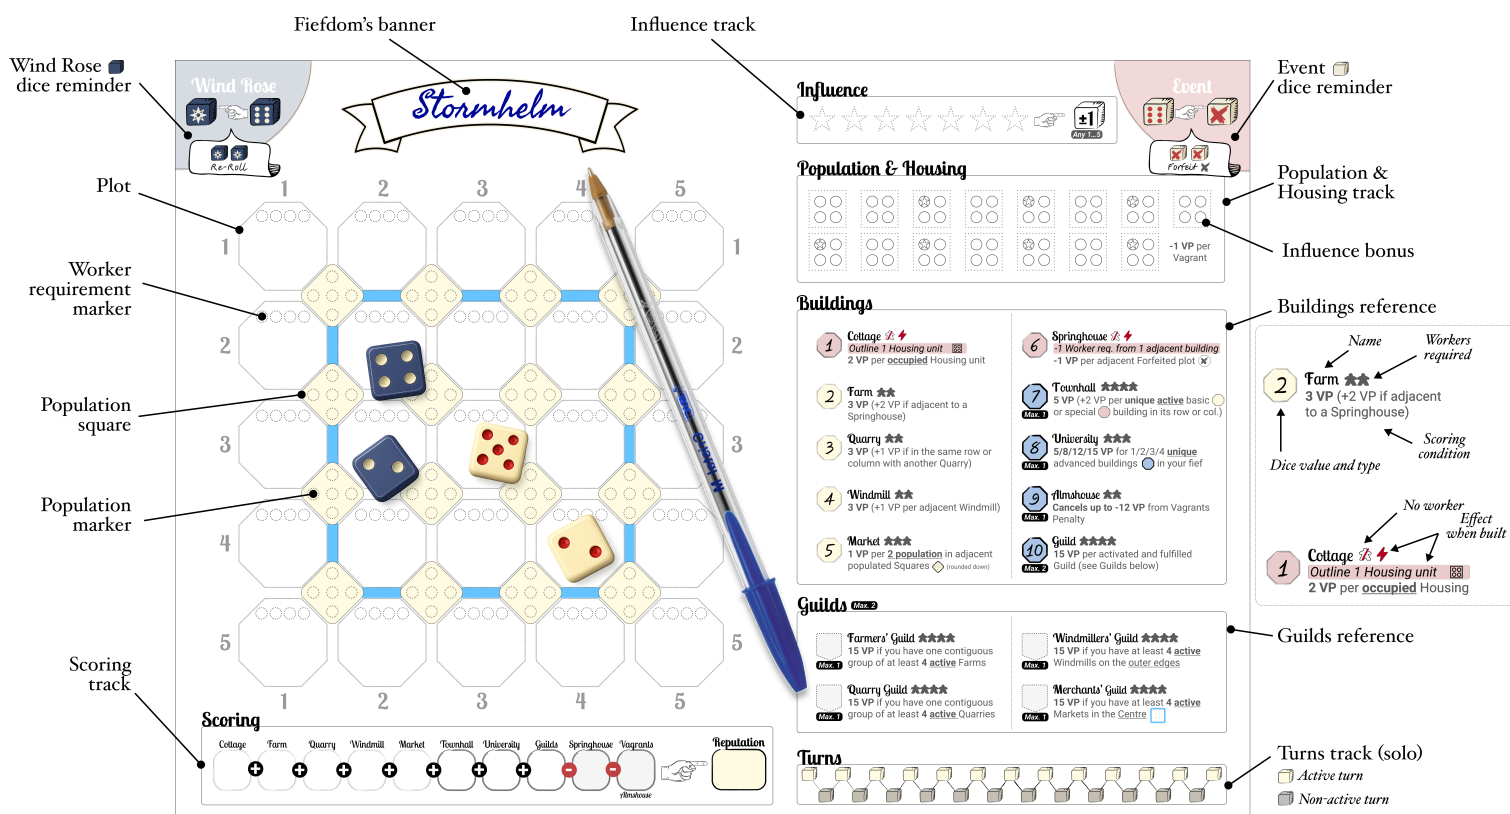

Overview

In **Rolling Fiefdoms**, you build a small fief through clever dice pairing and planning. Each turn, the Regent will roll four dice, pair them, then players will decide where to build cottages, markets, and landmarks in their fief. When all plots are filled, allocate workers to score buildings and to see whose fief prospers most.

Setup

1. Give each player one **Fiefdom Sheet** and a pen.
2. On your own sheet, write the name of your fiefdom in the banner.
3. Take two white d6 dice as **Event dice** (6 is a ) and put them where players can reach.
4. Take two blue d6 dice as **Wind Rose dice** (6 is a ) and put them where players can reach.
5. Choose a starting **Regent**. Turns proceed clockwise.

Fiefdom Sheet

The Fiefdom Sheet is a comprehensive game board divided into several sections:

- Fiefdom's banner:** A central banner for the player's fiefdom name, currently showing "Stormhelm".
- Influence track:** A row of 10 stars for tracking influence.
- Population & Housing:** A grid of 10 squares for tracking population and housing.
- Buildings:** A list of 10 buildings with their respective costs and effects.
- Guilds:** A list of 4 guilds with their respective requirements and rewards.
- Turns:** A track for tracking the number of turns.
- Scoring:** A track for tracking the final score.
- Plot:** A 5x5 grid of plots for building.
- Worker requirement marker:** A marker for tracking worker requirements.
- Population square:** A square for tracking population.
- Population marker:** A marker for tracking population.
- Scoring track:** A track for tracking the final score.

Labels and callouts include:

- Wind Rose dice reminder
- Event dice reminder
- Plot
- Worker requirement marker
- Population square
- Population marker
- Scoring track
- Influence
- Population & Housing track
- Influence bonus
- Buildings reference
- Guilds reference
- Turns track (solo)
- Active turn
- Non-active turn

Turn Structure

Every turn, follow three steps:

1. The Regent **rolls** all four dice.
2. The Regent **pairs** the four dice into two pairs.
3. Every player **builds** or forfeits a plot.

After everyone has built or forfeited a plot, the dice pass to the player on the left, who becomes the new Regent and starts a new turn.

PESTILENCE

When both  appear, it's a **Pestilence event**:

1. **Skip Pair and Build.**
2. All players **forfeit one empty plot** in their fief (see **FORFEIT**).
3. The turn ends immediately. **Pass the dice to the player on the left**, who becomes the new Regent and starts a new turn.

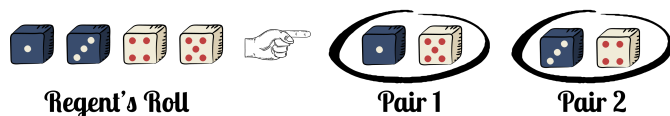

1 ROLL

The Regent rolls all four dice.

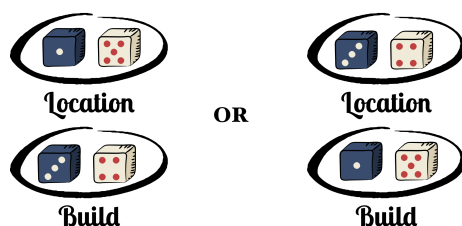

If 2  are rolled, then all dice must be re-rolled.

2 PAIR

The Regent pairs the four dice into two pairs.

Each player decides which pair is the **Build Pair** (what to build) and which is the **Location Pair** (where to build).

3 BUILD

Each player acts simultaneously, choosing one pair as the Build pair and the other as the Location pair:

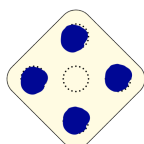

- The **Location Pair** shows where you'll build (e.g. dice 1 and 5 → (1,5) or (5,1)).
- The **Build Pair** decides what you'll build (see **BUILDINGS REFERENCE**) (e.g. dice 3 and 4 → Quarry, Windmill or Townhall).

and rolls:

- If one  appears on , that die may not be used for the Location Pair.
- If one  appears on , that die must be used for the Location Pair. It is a wild, and each player decides the value to use (between 1 and 5).

Build Options:

- Sum:** Add both dice to build a **Basic** (2–5), an **Advanced** (7–10) building, or a **Springhouse** (6).
- Split:** Use one die (1–5) to build. Use the other die to allocate **Population** by filling pips matching the die's value in an empty adjacent **Square** .

If there is no empty Square , you may still build, but do not add population.

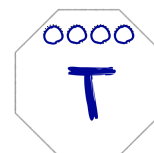

If the Build pair has one  on , this is a Build Split without population.

WORKER REQUIREMENT

After building in a location, **outline the number of Workers required** for that building at the top of the plot (see **BUILDINGS REFERENCE**). Those are the Workers required to activate the building at the end of the game.

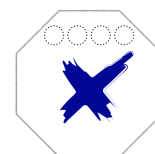

Example

The Regent rolls 1–3–4–5 and pairs (1,5) and (3,4). Use (3,4) to Build a Townhall (total 7) at Location (1,5), then outline its 4 Worker requirement.

FORFEIT

If **neither location is empty**, you must **Forfeit** a plot by drawing a cross on an empty plot of your choice.

Buildings Reference

There are 10 building types, each with a different with a different  build value,  workers requirement for scoring, and scoring conditions.

BASIC BUILDINGS (2–5)

Basic buildings can be built with a Split or Sum.

	Building		Scoring
2	Farm (F)	2	3 VP (+2 VP if next to a Springhouse)
3	Quarry (Q)	2	3 VP (+1 VP if in the same row or column as another Quarry)
4	Windmill (W)	2	3 VP (+1 VP if adjacent to another Windmill)
5	Market (M)	3	Score 1 VP per 2 Population <i>pips</i> across all adjacent Squares  (tally pips, divide by 2, round down)

SPECIAL BUILDINGS (1 & 6)

Special buildings have a one-time effect ⚡ that triggers immediately when built, and they have no Worker requirement 🛠️.

?	Building	★	Effect / Scoring
1	Cottage (C)	🛠️ ⚡	When built, outline 1 Housing unit. 2 VP if occupied by at least 1 Population (Population and Housing track)
6	Springhouse (S)	🛠️ ⚡	When built, remove 1 Worker Requirement (min 0) from an adjacent building. -1 VP per adjacent Forfeited plot 🗑️

ADVANCED BUILDINGS (7-10)

Advanced buildings can only be built with a Sum.

?	Building	★	Scoring
7	Townhall (T) Max. 1	4	5 VP + 2 VP per unique activated Basic or Special type in the same row or column
8	University (U) Max. 1	3	5/8/12/15 VP for 1/2/3/4 unique Advanced building built
9	Almshouse (A) Max. 1	2	Cancel up to 12 VP of Vagrant penalty at game end
10	Guild Max. 2	4	Build a unique Guild type (see Guild Types)

GUILD TYPES

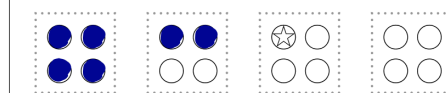

When building a guild, you must immediately decide which guild you are building by writing its initials.

Farmers (FG)	15 VP for a group of 4 or more connected Farms
Quarry (QG)	15 VP for a group of 4 or more connected Quarries
Windmillers (WG)	15 VP if 4 or more Windmills along the outer edges
Merchants (MG)	15 VP if 4 or more Markets in the Centre 

Population & Housing

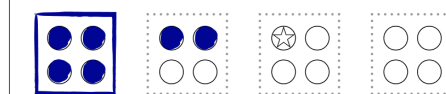

When Population is gained using the **Build Split**, track it both on your **Population & Housing track** and on the **Squares**  of your fief; when marking it on the **Population & Housing track**, fill pips starting from the top-left most Housing unit.

Population & Housing

Each **Cottage** provides housing for **4 Population** (outline the left-most available unit on the track).

Population & Housing

VAGRANTS

If your total Population exceeds available Housing, the excess becomes **Vagrants**. During scoring, Vagrants cause a penalty of **-1 VP per Vagrant**.

Example

3 Vagrants give a penalty of -3 VP.

Influence

Covering  on the **Population & Housing track** grants one **Influence point**. When gained, outline the leftmost Influence point on the **Influence track**.

Influence

During the Build action, use Influence to **increase or decrease by 1 the value of any one die** per Influence point spent. Scribble over each Influence point used.

Influence

You cannot use Influence to change a 🛠️ or 🌟 roll.

Influence changes one die only for the player who spends it; all other players use the original values.

Example

The Regent rolls 1-3-4-5 and pairs (1,5) and (3,4). Both Location pairs are occupied, so you spend 2 Influence to change the 3 to a 1 and use Location (1,4) to build on an empty plot.

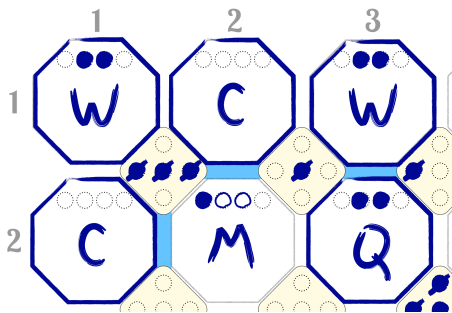

Game End & Scoring

The game ends when **every player's 25 plots are filled**, whether built or forfeited. All players proceed to the building activation phase before the final scoring.

1 BUILDINGS ACTIVATION

For each building with a Worker Requirement, assign adjacent Population pips to fill its Worker Requirement, crossing out each pip you use. One Population pip can be used to assign only one Worker to one adjacent building.

When a building's Worker Requirement is met, it becomes Activated (outline its plot).

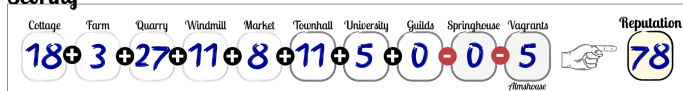

2 SCORING

- Score Cottages:** Each occupied Cottage (outlined Housing unit with at least one filled pip) is worth 2 VP.
- Score Buildings:** Activated buildings earn their listed VP and bonuses. Nonactivated ones score nothing themselves, but may still count for bonuses.
- Springhouse Penalty:** Lose 1 VP per Forfeited plot (X) adjacent to a Springhouse.
- Vagrants Penalty:** Lose 1 VP per Vagrant (activated Almshouse cancels up to -12 VP).

The player with the **most VP wins the game**. In case of a tie, the player with the most population wins.

Scoring

Solo Variant

Play with the same rules, alternating between **Active** and **Non-active** turns (Turns track).

- On **Active turns**, roll and pair the dice as usual.
- On **Non-active turns**, roll all four dice:
 - Pair the **two Wind Rose dice** (blue) together.
 - Pair the **two Event dice** (yellow) together.

Clarifications

BUILD

- You cannot add population pips to a Square (yellow) that already has some pips filled, even if not all 5 pips are filled.
- When using Split build, you cannot forfeit the building to add population.
- When a Springhouse is built, immediately reduce the Requirement of one adjacent building by 1 (min 0).
- Influence cannot decrease a die value below 1 or increase its value above 5.

SCORING

- Basic building scoring bonuses do not require other buildings to be active.
- Buildings with a Worker Requirement of 0 are considered activated.
- Almshouse does not grant VP if there are less than 12 vagrants.
- Guilds scoring requires that the matching basic buildings be active.
- Population from a Square (yellow) can be shared by multiple Markets.

Playtesting & Thanks

Huge thanks to everyone who playtested and gave feedback: Chase B., Daniel Y., Magdalena M., Tomasz M..
